

# Dental Plans

Currently we have Stage 1 and Stage 2 Dental Plans. Once a patient reaches Stage 3 or Stage 4 the care required is individualized and will require a customized Dental Plan

Services Included	Dental Plan
<p><b>Pre-Surgical Examination</b> This in-depth evaluation assesses your pet's overall health prior to under-going anesthesia for surgery</p>	
<p><b>Dental Examination</b> Evaluation of the teeth, tongue, throat and gingiva</p>	
<p><b>Intravenous Fluid Therapy</b> Keeps the patient hydrated, maintains blood pressure and aids in anesthetic safety</p>	
<p><b>Dental Cleaning</b> Dental charting, ultrasonic scaling, hand scaling, polishing and a chlorhexadine oral rinse</p>	
<p><b>Full Mouth Dental Radiographs</b> Radiographs are the only way to confirm any damage occurring to the root, crown and the jaw bone</p>	
<p><b>Anesthesia Package</b> Induction and general anesthesia, hospital stay and operating room set-up, EKG, blood pressure check, thermal regulation, heartrate and respiration monitoring, RVT monitoring</p>	
<p><b>Home Care Package</b> Complimentary tooth brush and Hill's prescription T/D Dental Diet</p>	
<p><b>2 Week Post Surgical Follow-up</b> Discussion and demonstration on brushing and at home oral care</p>
